### **T6 MULTIVAN**

- **7 seats including fully adjustable rear seats**
- **First class comfort and safety**
- **Upgraded interior with luxury car comfort and connectivity.**
- **Range from \$69,990\***

Volkswagen New Zealand announces the addition of the new 6th generation Transporter and Multivan to the Volkswagen Commercial Vehicles range. Across the entire 'T' model series' world-wide sales are around 12 million vehicles, which means 65 years of experience with customers and 65 years of contemporary transport solutions. Each individual generation led the way in terms of technology, and the sixth generation is no different in precisely meeting the needs of the market.

The new Transporter offers improved safety, comfort and convenience and greater driving dynamics, while retaining the practicality and flexibility that the Transporter has been so well-known for. The new Transporter is available from \$50,990\*

The new Multivan is a people-mover like no-other; offering real-world practicality to enable up to 7 people and their day packs, luggage, sports gear, etc to travel in first class comfort and style. The new Multivan is the only 4WD in its class – combining quality, versatility and perfection right down to the smallest detail, making it the ideal lifestyle vehicle for a family. The new Multivan is available from \$69,990\*.

The new Multivan is a people-mover like no-other; offering real-world practicality to enable up to 7 people and their day packs, luggage, sports gear, etc to travel in first class comfort and style. The new Multivan is the only 4WD in its class – combining quality, versatility and perfection right down to the smallest detail, making it the ideal lifestyle vehicle for a family. The new Multivan is available from \$69,990\*.

### **DESIGN:**

The T series is a classic in design. It has therefore been modernised cautiously, but has become even sharper, more precise and thus enhanced still further in quality. The lines, beads and edges run continuously from front to back. The entire body now has the appearance of being all one piece, as if milled from a solid block. Like its predecessors, the new T generation, too, thus remains immediately recognisable.

### **COMFORT AND CONVENIENCE (MULTIVAN):**

The variability of the seating layout makes the back a veritable playground in terms of reconfiguration. From normal boot to large cargo space – everything is possible, with the two rows of rear seats on a sliding floor rail system. The rear seats can also cleverly be converted into a make-shift bed, which sleeps three.

### **INFOTAINMENT:**

For safety and pleasure while driving, both models are fitted with a Bluetooth hands-free system and colour touchscreen stereos while the 'App-connect' interface can be specified as an optional extra. This innovative technology allows you to bring smartphone apps onto your infotainment system's touchscreen.

### **GENERATION SIX:**

To complete the Multivan line-up in New Zealand next year, we will see a special 'Generation SIX' edition model along with a Multivan Highline (from \$89,990\*). The special edition model is enriched by a number of exclusive features - tinted windows, LED headlights and rear lights, fog lights with cornering light and the chrome package. Also exclusively available as options are a selection of two-tone paintwork finishes with colour-coordinated decorative elements on the dash panel, plus 18-inch retro-design 'Disc' alloy wheels. Other features include Alcantara seats in an independent two-tone design, contrasting stitching for the leather trim of the multifunction steering wheel and gear lever. The Highline builds on the existing Multivan model, with features such as lane change assist, 18" alloys, sports suspension, LED headlamps, Navigation and heated seats in Nappa leather.

### **SERVICE ADVANTAGE**

Volkswagen Service Advantage is now available on Commercial Vehicles. By regularly servicing at a Volkswagen Service Centre you will extend the life of your vehicle, save money in the long run and also improve your vehicle's overall performance. Vehicles are serviced by certified and

trained Volkswagen technicians using genuine parts and materials which come with a 2 year factory backed warranty.
