THE PERFECT FRAME HEIGHT

MOUNTAIN BIKE	
Rider's height	Frame height
Up to 185 cm	48 cm
185 cm or taller	53 cm

You need to get the frame height right to enjoy cycling to the max. Therefore, please measure carefully and keep the following in mind: If the bicycle has a spring-mounted saddle support, a frame which is about 5 cm smaller should be selected. If the value determined is between two sizes, decide based on the cycling style. If you like a sporty ride, choose a smaller frame. A larger bicycle frame is more suitable for touring cyclists.

TREKKING, CITY & RETRO BIKES
